abtitle: Laser ablation using 1470 nm laser and radial fibres without TLA

presentation: Invited speaker

resfield: Veins

charcounter: 1598

abstract: The Phlebologic Unit of the Pontiac Catholic University of Porto Alegre, Brazil is a pioneer in the use of Endovenous Laser to treat Varicose disease in Brazil with 11 year experience.

Since 2008 the unit has adopted the 1470nm Laser delivered with radial fibres without TLA and under continous US control with a high index of success.
